

REJECT RACISM

# AMAZON & APPLE SHOULD REJECT RACISM, NOT REWARD IT.

North Carolina lawmakers  
are determined to pass a  
racist voter ID bill.

The same people who brought you the discriminatory  
bathroom bill are now trying to block eligible Black voters  
from the polls... AGAIN. Why would Amazon and Apple be  
complicit and reward NC with their new HQs?

We've been down this road before. The 2013 North Carolina  
voter suppression bill was struck down by federal courts,  
who said the law:

“

*Target[ed] African-Americans  
with almost surgical precision  
[and was] Enacted with racially  
discriminatory intent.*

”
